

Name of Course / Module	Corporate Finance				
Course Code	MBA-P 706				
ECTS	6				
Name of Academic Staff					
Rationale for the inclusion of the course/module in the programme	Corporate finance is an area of finance dealing with the financial decisions corporations make and the tools and analysis used to make these decisions. The primary goal of corporate finance is to maximize corporate value while managing the firm's financial risks. Although it is in principle different from managerial finance which studies the financial decisions of all firms, rather than corporations alone, the main concepts in the study of corporate finance are applicable to the financial problems of all kinds of firms.				
Year / Semester Offered	Year 1 Semester 2				
Total Student Learning Time (SLT)	Face to Face			Student Self-Learning	Total Guided and Independent Learning
	Lecture = 42 hours	Tutorial	Practical	Others = 78 hours	120
Pre-requisites (if any)	-				
Objectives	<p>To:</p> <ul style="list-style-type: none"> <li>Forecast financial statements, using a firm's current financial data and assumptions about future choices made by the firm</li> <li>Understand and apply time value of money principles in a variety of contexts</li> <li>Understand and apply risk-return principles in a variety of contexts</li> <li>Evaluate capital budgeting techniques to identify potential investment opportunities that add value to the firm</li> <li>Create a capital budgeting spreadsheet model and evaluate the decision to invest</li> <li>Estimate the cost of capital for a firm</li> <li>Evaluate advantages and disadvantages of sources for a firm's new funding</li> <li>Determine the impact of capital structure on the cost of capital and value of the firm</li> </ul>

Transferable Skills: Skills and how they are developed and assessed,	Information Technology and Information Skills	Employability	Study Skills	Problem Solving	Communication	Working with Others
Project and practical experience and Internship	Can monitor, assess and critically reflect on the use of IT and information skills and identify ways of further developing these skills	Can assess the effectiveness of the skills development and identify further ways of developing skills required by employers	Is autonomous in study and the use of resources for learning. Makes professional use of others in support of self-directed learning.	Is confident and autonomous in problem solving. Can isolate, clarify, assess and manage resolution of most relevant problems.	Can engage confidently in academic and professional communication with others within her/his field.	Can clarify a group task and lead, work with or work within a group towards defined outcomes, making appropriate use of the capacities of the group members. Is able to negotiate and handle conflict with confidence
Teaching-learning and assessment strategy	Traditional teaching methods are mostly fit for courses like this which require a high degree of theoretical knowledge although student participation through questions, opinions and constructive discussions is extremely valuable for an in-depth understanding of the course material. Written projects, in-class presentations and a wide range of exercises, are adopted as one of the best ways to acquire a better knowledge and understanding of the course material.					
Synopsis	<p>Students will gain a thorough overview of the rules and regulations surrounding mainstream corporate finance activities, highlighting those areas likely to cause serious problems if overlooked.</p> <p>The course will enable executive and non-executive of public companies and non-specialist practitioners to achieve a workable understanding of the legislation, rule books, conventions and practices surrounding corporate finance transactions – with emphasis on the practical issues involved in concluding a deal within the regulatory framework.</p> <p>A knowledge of personal responsibilities and potential liabilities should ensure that the specialist advice available to directors and their advisers during the course of a transaction is used to best advantage.</p>					
Mode of Delivery	Lectures					

Assessment Methods and Types	Assignment :: 50%	Case study Exam : 50%	
Mapping of the course/module to the Programme Aims	Key Skill	Developed and Assessed in Modules	Location and Description of Key Skill Assessment Opportunity (Formative and Summative)
	Information Technology and Information Skills	All taught modules MBA Themes	Both MBA themes culminate in the production and delivery of a group presentation. Student IT and information skills will be developed and assessed via theme based activities.
	Employability	All taught modules MBA Themes	Throughout the taught programme there is a constant emphasis upon acquiring and developing skills for employment
	Study Skills	All taught modules MBA Themes Project	Acquired and developed during the management of knowledge programme and research techniques module.  Prerequisite to a taught modules  The MBA themes also promote problem solving.
	Problem Solving	All taught modules MBA Themes	All modules involve problem solving in business  All modules include case studies/workshops to develop problem solving skills (isolate, clarify, assess and manage resolution of business problems)  The MBA themes also promote problem solving.
	Communication	All taught modules MBA Themes	Discussions with class/group members using case studies and current business issues are part of taught element of each module  Each taught module requires the production of an assessed report worth up to 50% of module mark. Its assessment includes effectiveness of written communication.  During the taught programme students will deliver several verbal presentations – at least two of which will be assessed.  Each theme concludes with student groups delivering a verbal presentation to panel of assessors.

	Working with Others	All taught modules	Group work is part of the taught element of each module.			
		MBA Themes	A constant in theme delivery is student group work. Students are expected to work in groups throughout the taught stage and especially during the theme residential event.			
Mapping of the course/module to the Programme Learning Outcomes	Information Technology and Information Skills	Employability	Study Skills	Problem Solving	Communication	Working with Others
	Can monitor, assess and critically reflect on the use of IT and information skills and identify ways of further developing these skills	Can assess the effectiveness of the skills development and identify further ways of developing skills required by employers	Is autonomous in study and the use of resources for learning. Makes professional use of others in support of self-directed learning.	Is confident and autonomous in problem solving. Can isolate, clarify, assess and manage resolution of most relevant problems.
